

Mental Health Resources for Facilities

Mental health challenges are common among the End Stage Renal Disease (ESRD) population. The Southern California Renal Disease Council, Inc. receives multiple calls per week that are representative of this co-hort among the ESRD community. Many of the calls received by the Patient Services Department have been regarding minor adjustment and depression concerns as well as seeking guidance and information on Schizophrenia, Personality Disorders and Dementia. The Patient Services Department would like to provide facilities with resources that can be used to locate the appropriate out patient mental health agency or perhaps complete a depression scale with your patient.

Mental health issues should not be overlooked or undermined. Many of our patients experience severe sadness, anger, depression, and anxiety with the on-set of their ESRD diagnosis. Additionally, many of patients may enter into a dialysis facility with an already diagnosed severe and persistent mental illness. Regardless of the severity of the patients mental health needs, it is expected that the dialysis facility will coordinate appropriately with out patient mental health agencies and provide the best possible collaborative care to meet the patients' needs.

The crisis services staff have legal authority per Welfare and Institutions Code (WIC) 5150 and 5585 to perform evaluations for the involuntary detention of mentally disordered adults and children respectively. Staff evaluate patients to see if they meet criteria for danger to self, danger to others, or grave disability. If a patient has stable, ongoing mental health problems a referral to an outpatient mental health clinic would be more appropriate. Note that if patient is being violent or making immediate threats, 911 should be called immediately.

Please contact Network 18 to consult with the Patient Services Department should your patient have mental health related issues at (323) 962-2020 or toll free at (800) 637-4767.
